

AN 10/068,814
Page 7**BEST AVAILABLE COPY****REMARKS**

Claims 1, 3, 5, 6, 11, 12, 14-17, 19-21, 23, 25-34 and 41-48 were pending in this application and all have been rejected in the Office Action. The examiner has acknowledged that claims 14-16, 31, 32 and 34 would be allowable if rewritten to overcome the rejections under 35 U.S.C. § 112, ¶2 and to include all of the limitations of the base claim and any intervening claims. Claims 17 and 43 have been canceled, with the limitations of claim 17 incorporated into claim 1, and the limitations of claim 43 incorporated into claim 41. The applicants have amended claims 1, 3, 5, 11, 19, 21, 41 and 48 and respectfully submit that claims 1, 3, 5, 6, 11, 12, 14-16, 19-21, 23, 25-34, 41, 42 and 44-48 are now allowable.

The examiner rejected claim 48 under 35 U.S.C. § 112, ¶¶ 1 and 2. Specifically, the examiner objected to the lack of recitation of an IC chip. The applicants have amended claim 48 to include specific reference to an IC chip. The rejection is therefore overcome.

The examiner further rejected claims 1, 3, 5, 6, 11, 12, 14-17, 19-21, 23, 25-34 and 41-48 under 35 U.S.C. § 112, ¶2 as being indefinite. The rejections of claim 17 and 43 are moot in light of the cancellation of those two claims. As to independent claims 1, 41 and 48, the examiner objected to the phrase "forming a majority of the rigid beam region" and similar phrases. In response, the applicants have amended claims 1 to recite "lengthwise at least half of the length between the spring region and flexure"; amended claim 41 to recite "occupying at least half of the length of the rigid region and at least half of the width of the rigid region"; and amended claim 48 to recite "at least half of the length and at least half of the width of the rigid region".

As to claims 3, 5, 6 and 11, the examiner rejected these claims for being dependent on a canceled claim. The applicants have amended the claims as appropriate so that each claim now depends on a pending claim.

The examiner further rejected claim 19 for the use of the phrase "aerodynamic cross-sectional profile". The applicants have amended claims 19 to recite "a rounded edge to minimize wind drag" and believe that this amendment overcomes the rejection.

The examiner further rejected claim 21 for the use of the phrase "configured as a heat dissipation structure". The applicants have amend claims 21 to recite a structural feature, "grooves", and believe that the amendment overcomes the rejection.

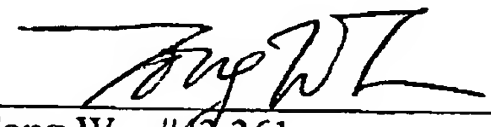

The rejection of 1, 3, 5, 6, 11, 12, 14-17, 19-21, 23, 25-34 and 41-48 for indefiniteness have therefore been overcome.

Applicant respectfully requests that a timely Notice of Allowance be issued in this case.

Respectfully Submitted,

RAYMOND R. WOLTER et al.
